Introduction of team

Hi we are Newbie Coders team from IIITG
Our team head is Saurabh Kumar Pandey and other
members are
Dhananjay Yadav ,Anurag Thakur and Navin Kishor
On our project domain Tourism we have contributed together
for different parts of the project .
Email id: dhananjay.yadav@iiitg.ac.in

Problem statement

our Problem statement is promoting tourism and Raising issues against not maintaining a proper code of conduct on these tourism sites under the heading tourism
So regarding this we have created a website called Happy Journey, on this website we have put all types of tourism like religious and spiritual sites along with adventures and all so that all domains of people who love to travel this site will attract.

.

For our second part of the problem statement we have add Our code of conduct for the travellers that include how they are supposed to act at these tourist sites and also for our travellers safety we have add helpline no and respective authorities no. in case like sexual abuse ,child abuse,fraud ..and also we have create a rapid action task force to act in this situation

Tech stack used in our problem

HTML

CSS

Javascript

We have hosted our website on netlify. After uploading on github

Features of our website

In the tourism industry there are many competitors but we have tried to make our website according to the problem statement and we have added some different features that make us different from others and we have tried to make our website user friendly.

Site map

Home

Destinations →in this we have added subcategories like popular destination ,spiritual destination

Experiences→in this we added the blogs by our fellow travellers.on topics like Adventure tourism and Yoga and wellness.

Your Queries→this part we have created using a simple javascript code where people who visit our website can post any question or suggestion and will get answers from other visitors.

Book your Trip→ this is for booking a trip to your dream destination.

Our code of conduct → in this we have provided the do and don't for the travellers along with help guidelines.

Queries and suggestions post by visitors

Extension of our website

at last as our website is only a prototype due to time constraints in Book Your   trip navigation bar we have given the link of other booking website with whom we have collaborated otherwise we will create our own booking platform in which we will provide our registered guide who will be multilinguistic like how OLA provide a registered driver. a traveller will already know who is going to guide him so this will minimise the problem of fraud in this industry and other insecurities faced by travellers that will boost the trust in this Industry.

Experience of participating in this Tink-A-Thon

As it is our first hackathon our aim was to successfully submit our solution. in first some hour we decided the topic and collected the resource for that after that along with our lab and classes we worked on that we got a chance to work in a collaborative environment in this 48 hours our learning speed was fast we learnt a lot of course could not apply all but in total it was really a good learning experience with fun .
